DI-808 Quick Start

1 Apply power and connect the DI-808 Ethernet port to an Ethernet port on your computer.

2 Type http://169.254.67.83 into your browser window and you should see an authentication request.

If you are unable to connect to the page, ensure that your PC is using DHCP and not a static IP. Check with your office's IT personnel if you are not sure.

Note: Your PC does not require internet access to connect to the device.

3 Login as the Administrator:
Default username: *admin*   Default password: *admin*

4 Full documentation is embedded in the device and is accessible upon login.
